

RxB Cyber security management game (Health, Energy & Maritime)

CSP001_CS-E_H

PRESENTATION BY:
LOUISE PRÆSTIIN JEPSEN

Learning outcomes

Completion of this training material, should provide learners with a better understanding of various concepts in the following areas:

Knowledge:

- Cybersecurity Essentials and Management.

Skill and Competence:

- Prioritization, and resource management.
- Recognize different types of vulnerabilities.
- Learn about various attack vectors and strategies.
- Learn about various defensive mitigations and strategies.
- Learn about protocols from the NIST framework.

How to complete this module

1. Take the pre-evaluation!
2. Watch the tutorial video!
3. Play the game!
4. Complete the Quiz.
5. See your results!

1. Pre-evaluation

Take the pre-evaluation here: <https://rxb.seriousgames.net/pre-evaluation>

This evaluation will help gauge your pre-knowledge in the given cyber security subject. You will not be graded and you are not expected to know the answers, so just give it your best shot!

2. Watch the tutorial

Watch the tutorial: <https://vimeo.com/923348675/4077776bdb>

The tutorial video goes through the rules of the game so be sure to pay attention, as it will help you during your playthrough.

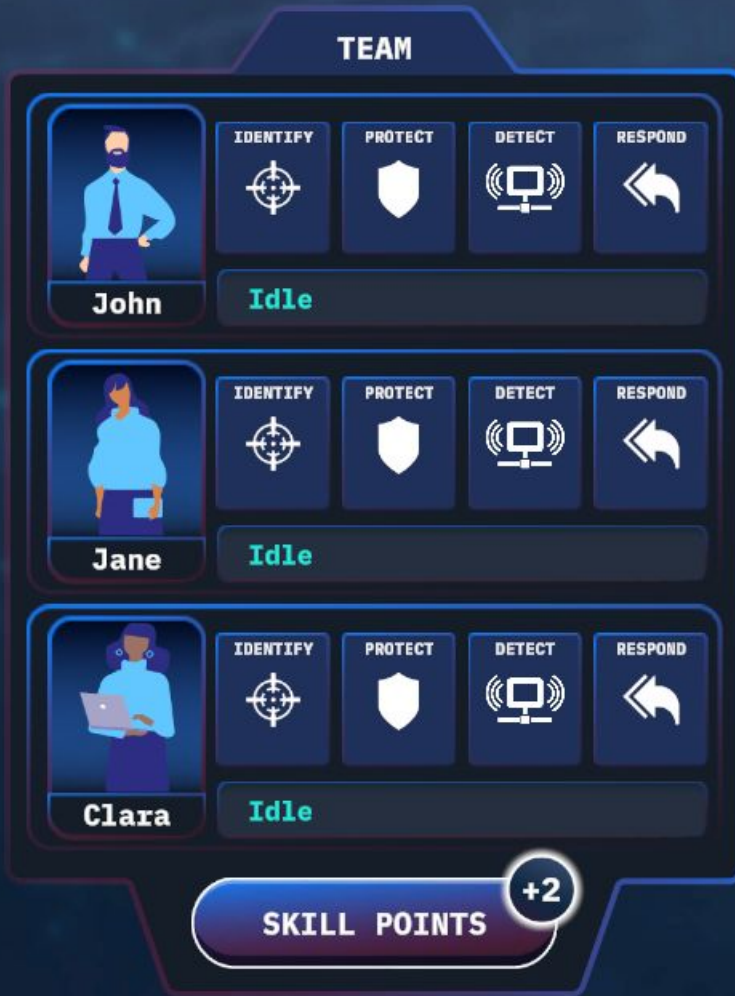

3. Play the game!

Open the game: <http://rxp-game.seriousgames.net/>

LOGIN: csp

PASSWORD: sgirxb24

Once in the game, press the  button and then select the Health sector. Good luck!

4. Complete the Quiz!

Take the quiz: <http://rxb.seriousgames.net/post-evaluation>

The quiz will be used to evaluate your personal learning outcomes from game.

Thank you
